two thumbs up
My GSI was really great! hE was informative and approachable! Thank you for encouraging class discussions and questions! you never had a tone of superiority!
Nishant made this already great course even better. I always found him extremely accessible, enthusiastic and willing to answer questions. There was no point at which I didn't feel that he was going above and beyond what was necessary to explain the course material to students.
GSI was extremely well–versed in all topics and was always helpful and approachable with questions. Could not have asked for a better GSI>
WOW I was so impressed with Nishant's teaching abilities. Made the material so accessible, especially for students like me with no coding experience and little statistical background. He explained everything so clearly and actually made me understand all of the concepts. If I got something wrong, he would explain it in ways that I actually understood why I was wrong, and how to do it right in the future!! He even extended explanations into interesting conceptual discussions that were really helpful. I feel like I actually learned in his discussion, and could definitely rely on him to really help me understand the material. My only suggestion would be to make people pay attention to the worksheets because he explains everything really well and clearly, but it's been hard to have everyone pay attention and not just immediately start the lab. I feel so lucky to have had Nishant teach my lab
