

Teaching Portfolio

Nishant Kheterpal

nskh@umich.edu | nishant.page

Lecture recordings from Summer 2024, when I taught DSC 10 ([course site](#)) and DSC 40A ([course site](#)) at UC San Diego, are publicly available at the following links:

- [DSC 10 Lectures](#)
- [DSC 40A Lectures](#)

The recordings do not include video of the classroom, which is only available to enrolled students in UCSD's system, but I have posted two DSC 10 lecture videos on Youtube:

- [The Central Limit Theorem](#)
- [Distributions, Sampling, and Bootstrapping](#)

The exams I wrote at UCSD are publicly available on the Practice Sites for DSC 10 and 40A:

- [DSC 10 Midterm](#)
- [DSC 10 Final](#)
- [DSC 40A Midterm](#)
- [DSC 40A Final](#)

An example of an assignment I helped create is "GPTEECs", in which students build a toy version of Retrieval-Augmented Generation (RAG). In GPTEECs, students implement tf-idf to identify relevant documents (class syllabi, [here](#)) based on a question and then query the Groq LLM API with their question and relevant documents. This assignment, from *Practical Data Science* (EECS 398-003) at Michigan, can be found at [our course GitHub](#).

A lecture recording from a review session I led at Michigan, for *Practical Data Science*, is available publicly with lecture video at [this link](#). As a review session, I taught it more casually, going over our course midterm and talking through problem-solving strategies.

The remainder of this portfolio contains a compilation of all my teaching evaluations from 2016 to 2025, beginning with a summary cover sheet.

Compilation of Teaching Evaluations

The following table contains the instructor evaluation ratings for each class I've TA'd or taught, from Michigan, UC San Diego, and Berkeley, in reverse chronological order. These numbers come from the official course evaluations at each institution.

Course and Semester	Institution	Role	Rating	# Respondents	Page(s)
EECS 280, Fall 2025	Michigan	TA	4.3/5	13	3-8
<i>Practical Data Science</i> , EECS 398-003, Fall 2024	Michigan	TA	4.7/5	22	9-21
DSC 40A, Summer 2024	UCSD	Instructor	4.6/5*	16	22-32
DSC 10, Summer 2024	UCSD	Instructor	4.5/5*	9	33-38
EECS 280, Winter 2024	Michigan	TA	4.9/5	9	39-54
ROB 599, Fall 2023	Michigan	TA	4.9/5	9	55
Data 8, Fall 2018	Berkeley	TA	4.6/5	30	56-61
Data 8, Spring 2018	Berkeley	TA	4.6/5	14	62-67
Data 8, Fall 2017	Berkeley	TA	4.6/5	10	68-73
Data 8, Spring 2017	Berkeley	TA	3.8/5**	58	74-79
Data 8, Fall 2016	Berkeley	TA	6.2/7	11	80-109

- *Evaluations from UCSD did not directly ask students to rate my effectiveness as an instructor; the closest question was “The instructor effectively communicated course goals, learning outcomes, and expectations.” I have used these for the UCSD ratings.
- Evaluations at Michigan and Berkeley asked students, respectively: “Overall, Nishant Kheterpal was an excellent teacher.” and “Considering both the limitations and possibilities of the subject matter and the course, how would you rate the overall effectiveness of this graduate student instructor?”
- For DSC 40A, I've also attached all responses, verbatim, to course surveys asking students for feedback on the instructor.
- Evaluations for EECS 280 in Winter 2024 include a classroom observation report by a Teaching Consultant from Michigan's Center for Research on Learning and Teaching.
- **Ratings are lower in Spring 2017 due to a survey issue where students I did not teach were asked to rate my teaching; I believe many answered 3/5 or “Neutral”.
- Data 8 in Fall 2016 and *Practical Data Science* in Fall 2024 were cross-listed, so evaluations are split. I've aggregated the ratings here and in my CV.
- Course descriptions and sizes can be found on my CV.
